

VELOCITY SA has defined its current Quality Policy, which is linked to its philosophy, market needs, and applicable legislation.

VELOCITY is the first Greek consulting company specialized exclusively in Energy and Sustainability. Through a team of experienced business executives determined to enhance the development of industries and other sectors in an environment characterized by instability, it aims for a holistic approach through four fundamental pillars of operation:

- Reducing Energy Costs and Risk Mitigation Techniques
- Control and Management of Energy Data
- Analysis and Prediction of Energy Market Trends
- Sustainable Development Strategy through the integration of ESG criteria

In the context of continuous improvement of its operations and services, **VELOCITY** has developed and implemented a Quality Management System (QMS) in accordance with the requirements of the **ISO 9001:2015** standard.

The company's management is committed to:

- Effectively implementing the QMS
- Complying with the legislation related to the operation of the business
- Ensuring and providing the necessary resources for the compliance with the QMS requirements and its continuous improvement

This Policy is available to the public, supported by measurable objectives, and is reviewed annually by **VELOCITY's** management.
